Toll Refining to Pool Metal

Recycler Directed

Hedged on the final day of arrival to UCC. Early payment (5 to 10 business days from arrival), final payment upon final assay (30-45 days from arrival), or metal outturn (120 days).

Hedge possible up to two weeks prior to arrival.

You choose the dates, hedges, market prices, and payment dates.

United Catalyst chooses dates of hedges and market prices before final assay, but does not take payment until a later time (up to exceeding metal outturn date).

You choose the dates of hedges and market prices before final assay, but do you do not take payment until a later time (up to and exceeding metal outturn date).

You run the load without pricing it; you may sell metal before, on, or after outturn date and take payment as directed.

You do not hedge or price metal. On the metal outturn date, the must be valued and metal sold to pay processing and refining charges. You may also pay refining and processing charges by check or wire. Remaining metal is transferred to the UCC pool account and then to your pool account.

100 Industrial Blvd., Fountain Inn, SC 29644
